The Aleut are also seeking to develop the water system which has been well maintained and designed for a larger Naval population as an export industry.

Tourism

Land use permits are required for all non-residents visiting Aleut Corporation land. Permits can be obtained from the Aleut Enterprise LLC office in Anchorage, or from the Harbormaster at the Port of Adak.

Aleutian Housing Authority (AHA) is the only provider of lodging on Adak, and offers both long-term and short-term accommodations in former Naval officer housing. Housing units are heated, furnished, and include local telephone and cable TV service. It is advisable to make reservations in advance.

At Kuluk Bowl for bowling August 2007

The cabins once maintained within the Alaska Maritime National Wildlife Refuge have fallen into disrepair and are unsafe to occupy. The cabin at Three Arm Bay sits on an archaeological

site that was transferred to the Aleut Corporation, and is no longer available for rental to the general public.

Camping is possible without a permit on Alaska Maritime National Wildlife Refuge lands, but is generally not recommended due to the harsh climate. The wind on Adak is highly variable and often unpredictable. Gusts can exceed 100 knots (190 km/h) or more (the record speed is unknown because the wind ripped the anemometer off of the tower). During the calmer summer months, sustained wind speeds average in the low double digits gusting to 50 knots (93 km/h) or more.

Adak offers 16 miles (26 km) of paved and gravel roads. These can be explored on foot, by bicycle, or by renting a truck. There is only one vehicle rental business on Adak.

Hunting and fishing are bountiful sports in Adak. Hunters particularly prize Adak caribou, the largest of which can exceed 700 pounds. There is no bag limit for cows, but in 2007, the Board of Game passed new regulations for bulls. If you want to get to the South end of the island where the majority of the caribou are there are currently two licensed local boat charter services - Aleutian Adventure Tours and Homeward Bound Charters. Anglers can find large to enormous halibut in the Kagalaska Straits. Hunters must possess an Alaska state hunting license and a harvest ticket for each animal taken. Non-residents of Alaska must also possess the appropriate big game tag. Anglers require a sport fishing license. All areas of the island with roads are owned by the Aleut Corporation, and a special permit is required for all non-residents accessing this private property. No ATVs are permitted within the wildlife refuge and the Aleut Corporation only allows ATVs on the roads and trails - not on the tundra. Under Alaska state law, wastage is illegal.

Audubon enthusiasts generally do not consider Adak as exciting as Attu. That being said, the high winds are a blessing for birders; many vagrants from Asia and elsewhere can be spotted. Indigenous (but often rare) shore birds abound, and eagles are ubiquitous. Visitors not insistent upon scoring "First North America" sightings will find plenty of variety to enjoy.

Developed trails are limited and most are not maintained. It is possible to hike on the tundra, but visitors are advised both to prepare for frequent weather changes and to never hike alone.

Nightlife and dining opportunities are few on Adak. The Aleutian Sports Bar and Grill (aka ASBAG) is located in the former VFW hall. In addition to a fully licensed bar, ASBAG offers a typical bar menu. Across town is a liquor store. Adak General Store operates out of the former Housing Community Center, as does the Cold Rock Cafe which is open for breakfast and lunch during weekdays only. The bowling alley (Kuluk Bowl), as of 2009, opens for summers only.

Education

Adak is served by the Aleutian Region Schools.

The Adak School serves grades K-12.

X Not applicable.

- [1] Other Asian alone, or two or more Asian categories.
- [2] Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories.
- [3] One of the four most commonly reported multiple-race combinations nationwide in Census 2000.
- [4] In combination with one or more of the other races listed. The six numbers may add to more than the total population, and the six percentages may add to more than 100 percent because individuals may report more than one race.
- [5] This category is composed of people whose origins are from the Dominican Republic, Spain, and Spanish-speaking Central or South American countries. It also includes general origin responses such as "Latino" or "Hispanic."
- [6] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner."
- [7] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.
- [8] The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, vacant units that are "for sale only," and vacant units that have been sold but not yet occupied; and then multiplying by 100.
- [9] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units "for rent" by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

Total Road Miles

60 miles

Subscribers Per Road Mile

W'CC:

.75 subscribers per road mile

WCB:

.85 subscribers per road mile

Information Regarding Lack of Alternative Providers

Exhibit 2

Explanation of Map

This Map shows the coverage area of the three carriers that provide service to the Adak Area.

- The small red circle represents the Alaska Wireless coverage area for its wireless service. The area inside the circle is downtown Adak.
- The area inside the black hash marks represents the Adak Eagle Enterprises service area in which it provides wireline local exchange service.
- The green area represents the WCC wireless service area.

Please Note:

The area in green outside of the red circle represents the area in which WCC is the only provider of wireless service.

The area in green outside of both the red circle and the black hash marks represents the area in which WCC is the only provider of terrestrial voice service, taking into consideration all wireline and wireless options for the Adak area.

Two versions of the map are included, presenting different views of the same service area. One map provides a close-up view of the service area, and the other map provides a view from a greater distance so that the Commission can see the entire geography of the area.

Explanation of Drive Test Data Attachment

Road tests were conducted by WCC's consultant, Mid-State Consultants from Nephi, UT on March 23, 2012. Mid-State used a single Nokia phone that has a Netmonitor Field Test application that measures Receive (Rx) levels in decibels (dB). Netmonitor Field Test 101 was used to measure receive levels. Netmonitor Test 109 was used to identify the source. At each test location, an Alaska Wireless simm card and a WCC simm card were alternately inserted and receive levels recorded. The attached charts shows highlighted in yellow the locations where the drive tests indicate that Alaska Wireless does not have any signal. There is no detectable voice or data service in these locations. Conversely, WCC is able to offer both voice and data service in all of these locations.

Range of -31 to -95 is good quality
Range of -36 and above is poor quality to no Service

<u>Testing</u>
Tests attempts were made for each type of call feature
(2) attempt per feature type were made in each location We awapped AWS & WCC simms at each test location and recorded the readings The Location numbers on the Excel sheet correspond to the numbers on the maps

<u>Equipment used;</u>
(2) All terrals well-clas (ATV)
(1) Nokia phone with a Net monitor Field Test that gives us the receive levels in decibels

Windy City Cellular, LLC List of Services Other Than Voice Provided Over USF Plant

In Addition to cellular voice services WCC provides the following over the cellular network:

Long Distance Calling - state and national Roaming - In Network and Out of Network SMS - Text Messaging Prepaid and Post Paid Data Transmission - Prepaid and Post Paid Voicemail services

Maps Showing Service Areas

Exhibit 5

Explanation of Contents of Exhibit 5

This Exhibit includes the following:

- 1 A map showing the area in which WCC is licensed to serve.
- 2 The area in which WCC actually provides service.
- 3 The area in which WCC is designated as a CETC.
- 4 The area in which WCC is the sole provider of mobile service (both a map and drive test data are included).
- 5- The location of each WCC cell site (including the planned, but abandoned, site for Clam Lagoon).
- 6 The number of road miles 59 miles total, 14 miles of which are paved.
- 7 The Population See the census information contained in Exhibit 1 (population of 326-331).
- 8 The Square Miles of the Adak Area See Exhibit 1 (122.4 square miles of land and 4.9 square miles of water).

Explanation of Map

This Map shows the coverage area of the three carriers that provide service to the Adak Area.

- The small red circle represents the Alaska Wireless coverage area for its wireless service. The area inside the circle is downtown Adak.
- The area inside the black hash marks represents the Adak Eagle Enterprises service area in which it provides wireline local exchange service.
- The green area represents the WCC wireless service area.

Please Note:

The area in green outside of the red circle represents the area in which WCC is the only provider of wireless service.

The area in green outside of both the red circle and the black hash marks represents the area in which WCC is the only provider of terrestrial voice service, taking into consideration all wireline and wireless options for the Adak area.

Two versions of the map are included, presenting different views of the same service area. One map provides a close-up view of the service area, and the other map provides a view from a greater distance so that the Commission can see the entire geography of the area.
